**Subject:** The review of your title for Scopus is completeis

Title: Journal of Robotics, Networking and Artificial Life  
ISSN / E-ISSN: / 2352-6386  
Publisher: Atlantis Press

Dear Dr. Masanori Sugisaka,

The title mentioned above has been evaluated for inclusion in Scopus by the Content Selection & Advisory Board (CSAB). The review of this title is now complete and the CSAB has advised that the title will be **accepted** for inclusion in Scopus. For your information, the reviewer comments are copied below:

The Journal of Robotics, Networking and Artificial Life aim to publish original research articles and reviews on the development of new technologies in the fields of robotics, networking and artificial life. It is a well-run journal which has a good editorial board. It has made progress in attracting better quality submissions. This now lies above the threshold for acceptance. The number of articles is not low and quality control remains important for the journal's progress; this needs to be monitored by Scopus. We hope that the Scopus listing may help in attracting high impact work. Good luck.

Our Source Collection Management department will contact the publisher of this title within the next three months to initiate the indexing process for Scopus. A content coverage agreement needs to be in place before we can start adding the content to Scopus.com. If you are the publisher, please do not send us your content yet unless requested by our Source Collection Management department

Yours sincerely,

Scopus Title Evaluation Support
