|              | 11:25 | Coffee Break                                           |                                                                          |                                                          |
|              | 11:50 | Plenary Talk<br>PT3   C- S. Zhang<br>Chair   H. Tanaka |                                                                          |                                                          |
|              | 12:40 | Lunch                                                  |                                                                          |                                                          |
|              | 13:25 | GS 18   ( 5 )<br>Chair   S. Sagara                     | OS 15   ( 6 )<br>Chair   K. Watanabe<br>will end at 14:55                | OS 10   ( 5 )<br>Chair   Y. Yoshitomi                    |
|              | 14:55 | Farewell Party (Room A)                                |                                                                          |                                                          |
|              | 15:45 |                                                        |                                                                          |                                                          |

GS: General Session OS: Organized Session

GS1 Artificial Intelligence, Artificial Living & Artificial Mind Research  
GS2 Artificial Life  
GS3 Bioinformatics & Cognitive Science  
GS4 Brain Science, Chaos & DNA computing  
GS5 Complexity  
GS6 Computer Graphics, Micromachines & Robust Virtual Engineering  
GS7 Evolutionary Computations  
GS8 Fuzzy Control & Genetic Algorithms  
GS9 Human-machine cooperative systems & Innovative Computations  
GS10 Mobile Vehicles- I  
GS11 Mobile Vehicles- II  
GS12 Multi-agent systems  
GS13 Neural Networks  
GS14 Pattern recognition  
GS15 Robotics- I  
GS16 Robotics- II  
GS17 Robotics- III

GS18 Robotics-IV  
GS19 Robotics- V  
GS20 Virtual Reality, Nano-biology & Nano-robotics  
OS1 Intelligent Control  
OS2 Intelligent Robot  
OS3 Robotics and Control  
OS4 Automata and Control  
OS5 Bioinformatics and Intelligent Classification (1)  
OS6 Bioinformatics and Intelligent Classification (2)  
OS7 Soft Robotics  
OS8 Learning and Robotics  
OS9 Dynamical Information Processing in the Brain  
OS10 Measurement and Control  
OS11 Bio-inspired Theory and Application  
OS12 Session of Economics and Management  
OS13 Intuitive Human-System Interaction  
OS14 Intelligent Systems  
OS15 Biomimetic Machines and Robots  
OS16 Embracing Complexity in Natural Intelligence  
OS17 Intelligent Control and Robotics
